

# Presentation of the VDE SPEC for the Evaluation of Cell Cracks in Silicon Photovoltaic Modules

---

## Q&A Session at Intersolar Europe 2024

On behalf of the consortium of the PV-Riss funding project, we invite you to an exchange among experts:

- Location: Booth A2.116
- Time: 19.06.2024, 14:00-15:00

### What to expect

The number of photovoltaic systems installed worldwide has risen sharply in the last 15 years. However, with increasing operating time under harsh environmental conditions, more and more abnormalities and defects in crystalline silicon photovoltaic modules, such as cell and microcracks, are becoming apparent. As part of the project, the VDE SPEC was developed as a standardized evaluation basis for current cell and module technologies, which we would like to present in this Q&A session.

### Target Group:

Energy suppliers, experts, module manufacturers, installers, developers and interested parties in the fields of photovoltaics, PV systems, maintenance, operation & maintenance and renewable energies

Supported by:

Federal Ministry  
for Economic Affairs  
and Climate Action

on the basis of a decision  
by the German Bundestag
